

# CBD SPECIFICALLY BRED FOR HIGHEST POSSIBLE POTENCY

- ZERO HEAVY METALS
- ZERO SOLVENTS
- ZERO PESTICIDES
- ZERO ARTIFICIAL FLAVORS

Our CBD extract is grown in this farm located in La Junta, Colorado. Unlike many oversea sources, strict quality control and product standards must be upheld in order to maintain US operations.

Our CBD is Absent Verified : We test each lot through a third party lab, to ensure there are no undesirable components.

## WE USE USA GROWN HEMP

Industrial hemp is genetically inferior to medicinal hemp, yet it is defined the same way by the regulatory agencies. Many brands/ companies/legal counsel, ignor US Farm Bill (section 7606) which created--for the first time since 1937--a federally-legal pathway to growing "industrial hemp" once again on American soil. Our "medicinal hemp" strain is U.S. grown and registered with the Colorado State Department of Agriculture as "industrial hemp."

## CBD DOSAGE AND EFFECTIVENESS

CBD is a very unique ingredient, in that it works with very small amounts. Certain effects can be met with as little as a few milligrams, so it is best to start with a small dose and slowly increase as needed. Taking too much was actually shown in many of the studies to lessen the effect of the ingredient. This is another reason products in tinctures (dropper bottles) are very appropriate for the ingredient as they can be dosed in small or large amounts.\*

Bama Max Strength Drops offer 6X dosage strength over our standard CBD extract. Available in natural flavor.

## OUR PROPRIETARY THC EXTRACTION METHODS

We use the super critical CO2 extraction and no external additives in a patented process. This allows us to retain all phytocannabinoids and terpenes for the best effect, while lowering THC from the industrial hemp standard of 0.3%, down to 0.00x%! Our product sets a standard of never containing a hundredth of a percent of the psychoactive component. To prove it, we supply retailers a third party test for review.

Bama Standard Full Spectrum CBD Drops are available in 2oz tincture bottles. Offering 11.67mg per serving, it is available in natural or refreshing peppermint flavor.

### FULL SPECTRUM CBD DROPS

# THE ENDOCANNABINOID SYSTEM AND CBD\*

Discovered in 1992, at Hebrew University, the Endocannabinoid system (ECS) is still being researched to this day. But it is very clear how important the ECS is to our overall health. The ECS plays a role in a number of cognitive, and physiological processes, through our receptors. There are two primary receptors, which are the CB1 and CB2 receptors. They are located throughout the body, and help to modulate the following processes:\*

## CB1

MAINLY LOCATED IN THE BRAIN AND NERVOUS SYSTEM

### Modulates

- Learning and Memory\*
- Anxiety
- Depression\*
- Pain and Inflammation\*
- Neurological Disorders\*
- Cardiovascular and Reproductive Functions\*
- Cancer\*
- Blood Sugar Balance\*

## CB2

MAINLY LOCATED IN THE IMMUNE SYSTEM

### Modulates

- Allergic and Autoimmune Inflammatory Disease\*
- Osteoporosis\*
- Neurodegenerative Disease\*
- Chronic Pain\*
- Alcohol and Nicotine Addiction\*
- Weight Gain\*
- Skin Health\*

By stimulating the ECS, CBD or cannabidiol, helps to modulate and influence a multitude of health functions.

## 10MG BROAD SPECTRUM CBD GUMMIES

60 Count Bottles

**TAKING CBD NEVER TASTED SO GOOD:  
TRY OUR GREAT TASTING CBD GUMMIES!**

Our CBD 10mg gummies have gained popularity for their potential to promote relaxation and ease mild discomfort. Some individuals report experiencing a sense of calm and improved sleep quality.

**Suggested Use:**  
1 Gummy as needed.  
Repeat as needed.

**\*Note:**  
Before increasing dosage, use just one gummy, to see how your body responds to CBD. Some people experience drowsiness, but usually at higher dosages.
